

Aqua Blox and Aqua Literz Are 5 Year Shelf Life Emergency Drinking Water Products.

Considering the broad nature, scope, and length of emergencies that could contaminate public drinking water supplies, a ***“proactive and dedicated emergency water response plan”*** is essential because the availability of potable drinking water is vital for the survival, safety, and welfare of first responders and victims of an emergency event.

- Severe weather...hurricanes, floods, tornadoes, winter storms
- Natural disasters...earthquakes, tsunamis, volcanic eruptions
- Pandemics...influenza, avian bird flu
- Terrorism...homeland security
- Bio terrorism...anthrax, plague, Q fever, ricin, tularemia
- Radiation emergencies...dirty bombs, nuclear blasts
- Chemical emergencies...nerve agents, chlorine, toxic alcohols

Why Not Bottled Water?

Because of bottled water's inherited properties of *processing, packaging, methods of storage, and the risk of water born bacteria development*, ***the Center for Disease Control and the Red Cross recommend changing stored bottled or jug emergency water every 6-12 months.***

Why Are Aqua Blox and Aqua Literz A Better Solution For Emergency Preparedness?

- Aqua Blox and Aqua Literz are specifically designed for emergency preparedness.
- Aqua Blox have a United States Coast Guard approved 5 year shelf life.
- Our manufacturing process utilizes ultra high temperature pasteurization yielding commercially sterile water.
- Aqua Blox and Aqua Literz multi-layered packaging is sterilized before packing and insures no light or air contact.
- A special interior barrier protects the purified water from package migration.
- Pallets and cases are compact and require less storage space.
- Aqua Blox and Aqua Literz may be used as a wound or eye wash.
- They can be frozen, used as ice or an ice pack, and consumed when thawed.

Why Are Aqua Blox and Aqua Literz A Superior Value?

In case of a non-emergency event year, Aqua Blox and Aqua Literz emergency water's *five year storage capabilities* eliminate the necessity and expense of restocking expired emergency water supplies every year. This concept also insures quality hydration for emergencies, improves supply chain and distribution logistics, and saves taxpayer dollars.
